

General Information

Educational Objectives

Upon completion of this session, learners should be able to:

- Understand how targeted therapies may change the treatment of pediatric sarcomas.
- Understand the role that education and mentorship play in the on-going growth of the field of musculoskeletal oncology.
- Understand the various practice models in orthopaedic oncology and how to best create an effective practice in each of these practice models.
- Have a general understanding of the types of research taking place within the musculoskeletal tumor society and how recent funding opportunities have helped advance that research.
- Understand the challenges faced in complicated clinical scenarios and how to work through these complex problems.
- Understand how best to identify meaningful new literature and how to apply that literature to your practice.
